

Tariff Administration  
105 Auditorium Circle, 11E-K-04  
San Antonio, TX 78205

July 11, 2002

Advice No.: IL-02-1085

To: Illinois Commerce Commission  
527 East Capitol Avenue  
Springfield, Illinois 62794-9280

The accompanying tariff sheets listed on the attachment are issued by Ameritech Illinois and transmitted to you for filing.

Pursuant to the Commission's Order in Docket No. 01-0614, issued June 11, 2002, Ameritech Illinois with this Compliance Tariff Filing makes changes in Ill. C.C. No. 20 to various Sections of its Unbundled Network Elements (UNE) Tariffs, Part 19; Performance Measurements Tariff, Part 2, Section 11; Resale Tariff, Part 22, Section 1; and Interconnection Service Tariffs, Part 23, Sections 2 and 4.

These UNE, Resale and Interconnection offering are classified as a noncompetitive telecommunications service pursuant to the applicable provisions of the Public Utilities Act.

Notice will be published in newspapers of general circulation and copies of the filing are available for public inspection in the Company's public offices in accordance with 83 Illinois Administrative Code.

We respectfully request your Commission to accept these sheets to become effective July 12, 2002.

Any questions and correspondence regarding this filing should be directed to Larry Parker, Director, Regulatory Affairs, who may be reached at:

Ameritech Illinois  
225 West Randolph Street, 27C  
Chicago, Illinois 60606  
Tel. No.: (312) 551-9172  
FAX No.: (312) 551-6310

Please acknowledge receipt by returning the extra copy of this letter.

Sincerely,

(Signed)  
Director - Regulatory Affairs

PART 19 - Unbundled Network Elements and Number  
Portability  
SECTION 20 - Enhanced Extended Loop (EEL)

4th Revised Sheet No. 1  
Cancels  
Original Sheet No. 1

**1. PROVISION OF ENHANCED EXTENDED LOOP (EEL)**

(N)

General

Enhanced Extended Loop (EEL) is a combination of Unbundled Network Elements (UNEs) consisting of Unbundled Loops and Unbundled Dedicated Transport, combined using the appropriate Cross-Connects, and where needed, multiplexing. The EEL connects a telecommunications carrier's customer in a Company central office, via an unbundled loop, to a separate Company central office or other facility arrangement within the LATA, via Unbundled Dedicated Transport.

Subject to the terms and conditions of this tariff, the Company will provide EELs, to requesting telecommunications carriers. Upon request, the Company will, where necessary, perform the work to combine its unbundled network elements to provide certain "ordinarily combined" EEL combinations. "Ordinarily combined" means that the requested combination is of a type ordinarily used or functionally similar to that used by the Company or the Company's end users where the Company provides local service.

An EELs combination, as defined above, will be considered an "ordinary combination" unless (1) the Company does not provide services using such a combination of unbundled network elements, (2) where the Company does provide services using such combinations, such provisioning is extraordinary (i.e., a limited combination of elements created in order to provide service to a customer under a unique and nonrecurring set of circumstances), or (3) the EEL combination contains a network element, feature, or functionality that the Commission does not require the Company to provide as or in conjunction with an Unbundled Network Element.

Irrespective of the definition of ordinarily combined and the associated criteria established above, the Company will, upon request, perform the work to combine the eight unbundled network element combinations proposed in the Ameritech Illinois 271 Amendment filed on March 28, 2001, which include:

- 2-Wire Analog Loop to DS1 or DS3 Dedicated Transport facilities
- 4-Wire Analog Loop to DS1 or DS3 Dedicated Transport facilities
- 2-Wire Digital Loop to DS1 or DS3 Dedicated Transport facilities
- 4-wire Digital Loop (DS1 Loop) to DS1 or DS3 Dedicated Transport facilities

All other ordinary loop and dedicated transport combinations shall be requested through the BFR-OC process outlined in Section 1 of this Part.

(N)

Issued: July 11, 2002

Effective: July 12, 2002

By Rhonda J. Johnson, Vice President - Regulatory Affairs  
225 West Randolph Street  
Chicago, Illinois 60606

PART 19 - Unbundled Network Elements and Number  
Portability

SECTION 20 - Enhanced Extended Loop (EEL)

3rd Revised Sheet No. 2

1. PROVISION OF ENHANCED EXTENDED LOOP (EEL) (cont'd)

(N)

General (cont'd)

When a telecommunications carrier requests the migration of currently combined Unbundled Network Elements to an EELs arrangement from an existing retail, special access, private line, or other arrangement, the Company will not, except at the explicit direction of the requesting carrier separate the combination. Currently combined Unbundled Network Elements may be migrated to EELs even if the resulting EEL is not an "ordinarily combined" EEL.

A telecommunications carrier may only request New EELs or the migration of currently combined Unbundled Network Elements to an EEL arrangement from an existing special access arrangement when the carrier can certify, and does so in writing, that the telecommunications carrier uses that EEL arrangement to provide a significant amount of local exchange service to its end-user customer pursuant to the criteria set forth by the Federal Communications Commission (FCC) in CC Docket No. 96-98, Supplemental Order Clarification, FCC 00-183, released June 2, 2000, as may be clarified or modified in subsequent FCC orders. For the purposes of this paragraph, the term New EEL means any EEL (including the eight EELs listed above) created by the Company at the request of a telecommunications carrier by doing the work to combine unbundled network elements that are not currently combined at the time of the request.

When a telecommunications carrier requests a network elements platform referred to in this Section, without the need for field work outside of the central office, for an end user that has existing local exchange telecommunications service provided by an incumbent local exchange carrier, or by another telecommunications carrier through the incumbent local exchange carrier's network elements platform, unless otherwise agreed by the telecommunications carriers, the incumbent local exchange carrier shall provide the requesting telecommunications carrier with the requested network elements platform within 3 business days for at least 95% of the requests for each requesting telecommunications carrier for each month. For such requests, the incumbent local exchange carrier shall provide the requested network element platform without any disruption to the end user's services. The service installation interval for requests for all other network elements platforms referred to in this Section shall be provided consistent with Section 13-801(d)(5) of the PUA or existing Commission orders. Where intervals are not defined, installation shall be provided at parity with the comparable retail service of the Company.

Chicago, Illinois 60606

PART 19 - Unbundled Network Elements and Number  
Portability

SECTION 20 - Enhanced Extended Loop (EEL)

3rd Revised Sheet No. 3

1. PROVISION OF ENHANCED EXTENDED LOOP (EEL) (cont'd)

General (cont'd)

Unless otherwise provided in an interconnection agreement or amendment thereto between the Company and a telecommunications carrier which is dated after June 30, 2001, that telecommunications carrier shall be permitted to subscribe to EELs under this tariff regardless whether or not the telecommunications carrier has an effective interconnection agreement with the Company pursuant to Section 252 of the Telecommunications Act of 1996.

The Company intends that this tariff fully complies with the Company's obligations under the Illinois Public Utilities Act as amended effective June 30, 2001 ("Illinois PUA").

The Company has filed this tariff under compulsion of the Illinois Public Utilities Act, including as amended by Illinois Public Act 92-0022, and specifically reserves any and all rights and remedies it may have relating to possible challenges to Illinois Public Act 92-0022 and this tariff under state and federal law, including federal preemption law.

Terms and conditions offered by the Company set forth in this Part 19, Section 20 for Provision of EEL as required at 13-801(d)(3) by amendment to the Illinois Public Utilities Act effective June 30, 2001, shall no longer be offered by the Company in the event that section 13-801(d)(3) is repealed, expires or otherwise no longer effective as enacted as on June 30, 2001.

Rate Application and Prices

Recurring Charges

The Company will apply all recurring charges applicable to each UNE comprising the combination as defined in Part 19, Section 2, Unbundled Loops and HFPL, and Part 19, Section 12, Unbundled Interoffice Transport.

Non-Recurring Charges

The non-recurring charges applicable to New EELs are listed below. The rate application descriptions are set forth in Part 19, Section 2, Unbundled Loops and HFPL and Part 19, Section 12, Unbundled Interoffice Transport with the following Interoffice Transport rate clarification:
